

Minasie Shibeshi

A passionate and highly skilled developer with expertise in fullstack development. Seamlessly bridging design and functionality. My mission is to craft elegant and efficient code that delivers exceptional user experience and drives business.

RELEVANT EXPERIENCE

Pillars Tech, Addis Ababa, ET — *Co-Founder*

DEC 2022 - PRESENT

- Lead in the design, development, and implementation of client specific software.
- Delegate tasks to other members of the dev't team and provide counsel on all aspects of the project, supervising the assessment of all deliverables in order to ensure quality and accuracy of the project.

Flawless Workflow, Overijssel, NL — *Software Developer*

JAN 2022 - PRESENT

- Developed numerous Microsoft Outlook and OneNote add-ins.
- Worked with product managers to devise ways to increase our clients' efficiency while decreasing redundant communications.
- Our OneNote Add-ins were instrumental in helping organize meetings imported from Outlook, resulting in an estimated 34% reduction in unnecessary communication.
- Our Outlook Add-ins performed extremely well, helping teachers organize and analyze their classes, increasing efficiency by 18%

iSense Technologies, Addis Ababa, ET — *Lead Software Engineer*

MAR 2020 - APR 2022

- Solely created and managed a full HRM, Time Attendance and Payroll system with support for various Biometric devices developed in .NET 5
- Removed the need to install multiple software solutions provided by various security device manufacturers, by consolidating them all into a versatile software boosting yearly revenue by \$850K.
- Created a modular design by which clients will be able to selectively install the services they would like to integrate, which removed unnecessary bloat and decreased employee software training time by 68%.

MNET Technology, Addis Ababa, ET — *Software Developer*

JAN 2019 - JAN 2020

- Collaborated with developers to create a text automation/bot system built over the Twilio API.
- Partnered with developers to create a system to be used for retail customers to gain loyalty points so they can spend their points on various types of charities.
- Built a Fleet management system, which allows overseeing and monitoring of inventory and vehicles. The system was immensely successful, boosting efficiency by 76%.
- All projects were made using Codeigniter (PHP) and MySQL, providing me with essential full stack skills to boost my career forward.
